torbo S120

torbo S120 – for thorough work

Challenges are its speciality. The torbo S120 was specially developed for jobs where gentle care is needed. It cleans sensitive surfaces thoroughly, leaving behind shining results even when other blast cleaning machines would have long given up. Its scope of application encompasses the cleaning of facades or sandstone monuments, its usage during renovation work or the removal of graffiti as well as the careful preservation of historical monuments with conservation of patina or the blast cleaning of patterns on glass.
