Softline 60

torbo Softline 60 - small but smart.

The torbo Softline 60 is a small mobile device for simple and effective, gentle cleaning of monuments and facades.

It requires no extra dehumidifier, no extra water hose to the jet nozzle and no heavy or expensive jet nozzle. Thanks to the control system, the blast abrasive mixture (80% blasting abrasive and 20% water) and extra water is metered out irrespective of compressed air, so that you can adjust the parameters independently of each other.
